

Magnetised water

You can now boost the power of all magnets that you are currently using, by a quite remarkable, 10 times

Here the science behind it. When you place magnets on the skin and wear them outside the body; the magnetic field has to penetrate through the skin and into the blood stream before it reaches the area of pain. This does not happen instantaneously, plus the magnetic field has to build in strength over a period of days. Fortunately, there is a way to increase the rate at which the magnetic field is absorbed as well as increasing the strength of the magnetic field at the area of pain. **HOW?** By drinking magnetised water.

Magnetised water is not witch doctory or hokum it is a scientifically proven and clinically tested way of radically increasing the power of therapeutic magnets.

The fact is, when you drink water that has been magnetised, the magnetism travels into the stomach and is absorbed into the blood steam through the bowel wall. It is then very rapidly distributed around the whole body. Plus the magnetic field that is circulating around the body has the same effect on the inside as the magnetic field has on the outside of the body. It will reduce inflammation and increase blood flow and oxygenation of the tissues, especially around any damaged areas.

And best of all it is perfectly safe to drink magnetised water when taking medication, there are no adverse effects on the body what so ever. It is totally safe, chemical and drug free.

Obviously, when you drink magnetised water you are tackling your problem from inside and outside at the same time. This 2 sided approach will most definitely increase the strength of the magnetic field at the point of pain plus it will also speed up the healing process by increasing the absorption rate of the magnetic field by an amazing 10 times.

What even more amazing (and possibly for some people unbelievable) is that magnetised water does so much more than just reducing inflammation and increasing blood flow.

Your body stores harmful toxins with in the tissues of the skin. These toxins are potentially harmful to your body and can not be safely detoxified by the liver. When you drink magnetised water the size of the water molecule is increased and its ability to absorb toxins is much greater, so as the magnetism flows around your body harmful toxins are drawn out of the tissues and safely transported to the kidneys for excretion from the body. **In a nutshell, you can lose as much as 2 litres (4pints) of retained water that you don't need.** The knock on effect of losing this excess waste fluid is that you will have so much more energy plus you will feel less tired, sleeping will be easier and generally you will have a great sense of wellbeing.

Probably the most incredible power of magnetised water is its natural ability to reduce high blood sugar levels in diabetics

Although scientists do not at this point know exactly how this works, they do know for absolute certainty that magnetised water has a balancing effect on hormone levels. That includes the hormone Insulin, which is responsible for diabetes. It is proven that drinking at least 4 glasses of magnetised water per day will help to regulate hormone levels and blood sugar levels. In many cases studied patients have been able to drastically reduce their medication as a direct result of drinking magnetised water on a daily basis.

All water is magnetized at source. The magnetism is destroyed during water treatment. Everybody can now drink magnetized water as nature intended by using the Magnopain magnetic water wand. Placed in a glass of cold water, juice, milk, pop or even alcohol for 15 minutes the Magnopain water wand will magnetize the fluid. The magnetized water is rapidly absorbed by the stomach and is distributed all around the body. It increases circulation, reduces blood pressure, eliminates excess fluid and toxins in the body. You will also benefit from increased energy levels, a sense of well being and pain relief. Just drinking 3-4 glasses a day will give all of these benefits. Each Magnopain magnetic water wand contains a 1500 gauss and an 800 gauss magnets and has a ten year life span.

If you suffer from any of the conditions below you will benefit from magnetized water.

Arthritis, Insomnia, High Blood Pressure, Migraine, Diabetes, I.B.S, Constipation, Colitis, Crohn's Disease, Diverticulitis, Psoriasis, Eczema, Dermatitis, Fractures, Bad circulation, Gout, Osteoporosis, M.E, Stress, Anxiety, M.S, Stroke, Fibromyalgia, Depression.

Literally thousands of people in the UK, including HRH Queen Elizabeth II, drink magnetised water every single day.

Benefits of Magnetic Water

- Magnetized water tastes sweeter and has more clarity.
- Magnetic water promotes a more alkaline pH in the body.
- Magnetic water promotes healing of wounds and burns.
- Magnetic water has a therapeutic effect on digestive, nervous and urinary systems.
- Magnetic water may also be beneficial for fevers, sore throat, menstrual and menopause discomfort.
- Magnetic water revitalizes the body.
- Magnetic water provides positive effect on the autonomic nervous system.
- Magnetized water has been reported to help regulate the heart function and clear clogged arteries.

- Magnetic water has been beneficial for kidney ailments, gout, obesity and premature aging.
- Magnetic water may help relieve pain.
- Magnetic water infuses energy into the body, controls bacteria, and stimulates brain function.

Other Benefits of Magnetic Water:

- Magnetic water controls scale build up in pipes, boilers and cooling towers.
- Magnetic water has a positive effect on plant growth. Magnetic water is more solvent and has a lower surface tension, so nutrients in the water are absorbed more readily. Use on agricultural crops results in higher production and improved quality of the plants with a reduction in the use of fertilizer.
- Magnetic water used on animals results in reduced mortality and improved health and vitality; increased weight of livestock; reduction of feed quantities.
